Multan, Pakistan

OBJECTIVE

Third-year Computer Science student at FAST NUCES seeking to contribute to functional business projects within Pakistan's leading digital enterprise. Eager to apply strong analytical, technical, and communication skills in a cross-functional, fast-paced corporate environment.

EDUCATION

FAST – National University of Computer & Emerging Sciences <i>Bachelor of Science in Computer Science</i> - CGPA: 3.0/4.0 Relevant Courses: Programming Fundamentals, Object Oriented Programming, Data Structures, Operating systems, Database management system, Software Design and Analysis	Aug. 2023 – Jun. 2027 (Expected) <i>Pakistan</i>
Muslim College <i>Intermediate (Pre-Engineering)</i>	Aug. 2021 – May. 2023 <i>Multan, Pakistan</i>

SKILLS

Productivity & Reporting Tools: Microsoft Office Suite (Word, Excel, PowerPoint), Google Docs, Git, GitHub, Visual Studio Code, Antigravity, Claude code, Notion,
Technical: JavaScript, TypeScript, Python, C, C++, React.js, Next.js, Node.js, MongoDB, RESTful API Design
Professional: Project planning & execution, research & insight generation, written & verbal communication, attention to detail

PROJECTS

Marco Paints – Full-Stack E-Commerce Platform <i>Next.js, React, TypeScript, MongoDB</i>	2025
- Independently planned, designed, and executed a complete end-to-end digital commerce solution from concept to deployment, managing all phases of the project lifecycle - Built a multi-role system (customer and admin) with product catalog management, order tracking, cart operations, and coupon systems demonstrating structured project thinking and attention to detail - Integrated third-party services (Cloudinary, Nodemailer, Google OAuth) and deployed the live platform on Vercel, gaining practical experience in how digital products are built and measured in production	
SPS Vista Website <i>React.js, TailwindCSS, JavaScript, React Router</i>	2025
- Developed a client-facing frontend platform for a startup, translating business requirements into a responsive, accessible digital presence - Conducted research on SEO and web accessibility standards, applied findings directly to improve the product's public-facing quality and discoverability	

EXPERIENCE

Software Development Intern <i>Software Productive Strategies (NSTP)</i>	Jul. 2025 – Sep. 2025 <i>Pakistan</i>
- Executed assigned development tasks independently, managing timelines and deliverables in a professional corporate environment - Prepared technical documentation and participated in team meetings, presenting progress updates and contributing creative solutions to improve existing processes - Researched industry best practices in accessibility, SEO, and frontend performance; applied findings to measurably improve product quality	
MERN Stack Intern <i>Devinity Solutions (US-based)</i>	Jul. 2025 – Sep. 2025 <i>Remote</i>
- Worked remotely with a US-based team, demonstrating strong communication, accountability, and the ability to operate effectively across time zones without supervision - Contributed to planning and executing full-stack development projects, coordinating with team members to meet milestones and maintain code quality - Produced functional deliverables on schedule, adapting quickly to new project requirements and brainstorming improvements to existing systems
